

Hashem Najdawi

Electrical Engineering Undergraduate

najdawihashem01@gmail.com • +962795433394 • Amman, Jordan

PROFILE

I am an Electrical Engineering student at Al-Hussein Technical University (HTU) with a strong interest in robotics, embedded systems, and intelligent engineering solutions. I enjoy designing and building hardware and software systems, with hands-on experience in Arduino, ESP32, sensor integration, motor control, and rapid prototyping.

I have led multidisciplinary engineering projects and participated in robotics competitions, where I developed technical, leadership, and problem-solving skills while collaborating with diverse teams. I am passionate about applying engineering principles to solve real-world challenges and continuously expanding my knowledge through practical projects, research, and innovation.

I am seeking opportunities to gain industry experience, contribute to impactful engineering projects, and continue growing as an engineer.

EXPERIENCE

Electrical Engineering Student at *HTU - Alhussein Technical University*

2024 - Present

Studying Electrical Engineering @HTU

Public Relations at *IEEE RAS HTU*

2025 - Present

Managing IEEE RAS HTU Public Relations Through Various Events.

Technical Assistant at *HTU HackerSpace*

2025 - Present

Working As A Technical Assistant at the HTU HackerSpace, Working On Various Engineering Projects, Helping Students, And Self Improving.

Event Management & Operations Experience

Contributed to a wide range of technical, educational, and community events in diverse capacities, progressing from volunteer positions to managerial and leadership roles. Supported event planning, logistics, operations, participant coordination, stakeholder communication, and team management. Developed strong organizational, problem-solving, leadership, and collaboration skills while ensuring the successful execution of events of varying scales.

EDUCATION

Electrical Engineering

2024 - Present

HTU - Alhussein Technical University

SKILLS

Robotics, Embedded Systems, Arduino, ESP32, PlatformIO, C++, Python, MATLAB, Simulink, Digital Electronics, Analog Electronics, Circuit Design, PCB Prototyping, Sensor Integration, Motor Control, Control Systems, LiDAR Sensors, Time of Flight Sensors, Machine Learning, Artificial Intelligence, Neural Networks, Technical Documentation, Research, Rapid Prototyping, Hardware Debugging, Software Debugging, Systems Integration, Engineering Design, Project Management, Team Leadership, Problem Solving, Critical Thinking, Communication, Public Speaking, STEM Education, Event Organization, Technical Writing, Git, GitHub, Microsoft Office, Excel, PowerPoint, CAD, Soldering, Troubleshooting, Innovation, Time Management, Collaboration, React, TypeScript, CSS, Node.js
